ENVIRONMENTAL

I am righting because I have recently heard of the DEP's current anti-degradation proposal. This proposal would lower water quality standards and allow for additional discharges into our best streams. This proposal would also eliminate many streams from qualifying for strong protection. Please reject this proposal! We do not deserve lower quality water.

I think you should adopt the Clean Water Act. Adopt the simpler and better standards of the EPA.

Please, after reading this letter, send me a reply.

Thanks For Your Time,

Michael Grant

To Whom It May Concern:
REVIEW COMMISSION

We are concerned about the changes that have been proposed to water quality regulation. We feel that these changes would lower water quality standards. We would like you to reject the DEP's current anti-degradation proposal and adopt the simpler, better standards of the EPA.

Our waterways are too important to lower our standards in the interest of big business.

Thank you for attention to this matter. We are interested in knowing your position on this important matter.

Respectfully yours,

A handwritten signature in cursive script that reads "Gerald + Ruth Arndt".

Dear Sir,

The Clean Water Act requires states to protect waterways from further degradation. The DEP is proposing new regulations that would lower water quality standards. The proposed changes would allow additional discharges into our rivers and streams and would eliminate many waterways in Pennsylvania from qualifying from strong protection.

I'm not a "beeding heart" type who is opposed to industry and commerce. However, as a resident of the City of Pittsburgh, I am concerned for the quality of the rivers that run through our city. Please consider the future of our waterways when you consider the current DEP proposals.

I am curious as to your views on this subject and would appreciate written response.

This note is to ask that you please reject the DEP's current anti-degradation proposal. Our waterways should not have to bear the burden of any additional discharges.

As it is, many of the fish taken in this state under the current protection are not fit for human consumption due to excessive hazardous materials in their bodies. Permitting additional pollutants to be introduced will only worsen an already unacceptable situation.

Additionally, think of the children that swim in or drink from these waters. Think of all the animals that survive by drinking this water. There are many more lives to think about than a few businessmen's bottom line.

For all of our sakes: Please reject the pending proposal. Many lives are counting on you.

Dear Ms. Freeman,

It has recently come to my attention that the EQB has proposed regulations that revise the Special Protection Waters program. Furthermore, it appears that the EQB is considering adopting the recommendations of the "pro-industry" contingent of the reg-neg group.

If this is indeed true, I find it very distressing. You and I both know that industry will always look after its own interests and that it is up to the rest of us to protect the environmental resources that remain in our state.

I am writing to urge the EQB to consider adopting the widely supported recommendations put forward by the "conservation stakeholders" and thereby do its part to preserve the rapidly declining natural stream environment in Pennsylvania.

Sincerely,

James Seif
Chairman Environmental Quality Board
P.O. Box 2063
Harrisburg, PA 17110

ORIGINAL: #1799
COPIES: NONE
(PER CAT)

Dear Mr. Seif:

I am writing to express my disappointment with the proposed regulations for the EQB to protect Pennsylvania's waterways, as adopted January 21, 1997.

We need regulations which meet minimum Federal requirements, and existing uses of our streams and rivers need to be protected unconditionally, as would be the case with Federal regulations, and not after a DEP "review of technical data."

"High Quality" protection needs to be extended to all streams where water chemistry is better than existing standards. We need regulations which improve rather than decrease the chance that a stream can become classified "High Quality." The biology test in your proposed rules would have the effect of disqualifying some streams from protection they otherwise would receive using Federal guidelines.

As a nearby resident of Unami Creek (in western Montgomery County), which is under consideration for "Exceptional Value" status before the EQB, I am very disappointed your proposed regulations would have the effect of making it more difficult for streams to be so classified. In addition, your proposed regulations do not properly take into account the role of U.S. endangered species and public ownership of land, and EPA concerns about discharges into our waterways.

You appear to be siding with polluters in your proposed rules, while ignoring most of the public comments following the May 1966 proposal for new Pennsylvania waterway regulations.

Sincerely,

*Ed + Linda Aucott
Green Lane, PA

RE: Proposed Antidegradation Regulations

I AM writing to EXPRESS MY CONCERN'S WITH THE PROPOSED ANTIDEGRADATION REGULATIONS. THESE PROPOSED RULES WERE ADOPTED BY THE E.Q.B. ON JANUARY 21, 1997. THESE PROPOSED RULES DO NOT MEET THE MINIMUM FEDERAL REQUIREMENTS, AND ARE WEAKER THAN THE PROGRAM ALREADY IN PLACE. THESE REGULATIONS WILL NOT PROTECT PENNSYLVANIA'S WATERS FROM DEGRADATION. ALL STREAMS WHERE WATER CHEMISTRY IS BETTER THAN STANDARDS, SHOULD BE GIVEN HIGH QUALITY PROTECTION.

EXISTING USES SHOULD BE PROTECTED, AS IN THE FEDERAL REGULATIONS, NOT AFTER A DEP. REVIEW OF TECHNICAL DATA.

THE BIOLOGY TEST IS NOT MANDATED BY FEDERAL REGULATION. A STREAM MIGHT FAIL THE BIOLOGY TEST BECAUSE ONE PARAMETER IS IN VIOLATION. EPA STATED IN ITS FINAL RULE THAT A VIOLATION OF ONE PARAMETER SHOULD NOT DISQUALIFY A STREAM FROM HIGH QUALITY PROTECTION.

MAR 28 1997

page #1

THE E.P.A. CANNOT APPROVE THIS RULE FOR A CHEMISTRY AND BIOLOGY TEST UNDER THIS PROGRAM STREAMS HAVE A LESS CHANCE TO BECOME HIGH QUALITY THAN UNDER THE CURRENT PROGRAM

STREAM ALSO HAVE LESS WAYS TO BECOME EXCEPTIONAL VALUE, THAN THEY DO UNDER THE CURRENT PROGRAM AND DESPITE THE NUMEROUS EXAMPLES IN THE DEFINITION THERE IS ONLY ONE WAY FOR A STREAM TO BECOME E.V.

IT IS ESPECIALLY TROUBLING TO ME THAT D.E.P. IS TAKING AWAY PENNSYLVANIA AND U.S. ENDANGERED SPECIES AS A CONSIDERATION FOR E.V. ALSO THE REMOVAL OF ANY CONSIDERATION OF THE PUBLIC OWNERSHIP OF THE LAND

DEP. DISREGARDED THE MAJORITY OF THE PUBLIC COMMENT THEY COLLECTED AFTER THE MAY 1996 DRAFT PROPOSED RULE MAKING AND CLEARLY SIDED WITH POLLUTERS. THESE PROPOSED REGULATIONS SHOULD BE REJECTED AND A NEW PROPOSAL PREPARED AND VOTED ON AS PROPOSED RULE MAKING. THIS PROPOSAL IS WAY OUT OF LINE! WHEN IS D.E.P. GOING TO START TO PROTECT THE WATERS OF THE COMMONWEALTH AS THIS GREAT "NATURAL RESOURCE" SHOULD BE

EQB,

The Clean Water

Act requires states to
protect waterways from
further degradation

Please reject the DEP's
current anti degradation
proposal which would
allow additional
discharges into our
beautiful streams

We need strong
standards that will
protect our waterways
from this degradation

As a new Grandmom
I want to be proud
of our system and
know that you will
protect our environment
so my Grandson and
his children will live
in a beautiful as well
as healthy world

Please write me
as to the results of
this issue.

Bless you all in
your choices. Making
the right ones for our
future. Virginia Hayes
