

Members of the Environmental Quality Board:

Please reject the DEP's current anti-degradation proposal! If adopted, the proposed regulations would lower water quality in Pennsylvania.

We need standards that protect our waterways from degradation. New regulations must provide for no new discharges into EV streams, return to the current standard for selecting HQ streams, and provide interim existing use protection while any proposal to reclassify a stream is reviewed.

Please do your part to protect our waterways.

Members of the Environmental Quality Board:

Please reject the DEP's current anti-degradation proposal! If adopted, the proposed regulations would lower water quality in Pennsylvania.

We need standards that protect our waterways from degradation. New regulations must provide for no new discharges into EV streams, return to the current standard for selecting HQ streams, and provide interim existing use protection while any proposal to reclassify a stream is reviewed.

Please do your part to protect our waterways.

Members of the Environmental Quality Board:

Please reject the DEP's current anti-degradation proposal! If adopted, the proposed regulations would lower water quality in Pennsylvania.

We need standards that protect our waterways from degradation. New regulations must provide for no new discharges into EV streams, return to the current standard for selecting HQ streams, and provide interim existing use protection while any proposal to reclassify a stream is reviewed.

Please do your part to protect our waterways.

Members of the Environmental Quality Board:

Please reject the DEP's current anti-degradation proposal! If adopted, the proposed regulations would lower water quality in Pennsylvania.

We need standards that protect our waterways from degradation. New regulations must provide for no new discharges into EV streams, return to the current standard for selecting HQ streams, and provide interim existing use protection while any proposal to reclassify a stream is reviewed.

Please do your part to protect our waterways.

Members of the Environmental Quality Board:

Please reject the DEP's current anti-degradation proposal! If adopted, the proposed regulations would lower water quality in Pennsylvania.

We need standards that protect our waterways from degradation. New regulations must provide for no new discharges into EV streams, return to the current standard for selecting HQ streams, and provide interim existing use protection while any proposal to reclassify a stream is reviewed.

Please do your part to protect our waterways.
