Subject: Oral orders

Dear Mr. Markham,

I am writing to you to today on behalf of the Pennsylvania State Nurses Association, which is the professional association for all registered nurses in Pennsylvania.

During these challenging times with workforce shortages, and particularly nursing shortages, it is in the best interest of patients to allow qualified nurses to accept oral orders in order to facilitate the delivery of safe, effective, timely quality care.

I am advised that the process is moving forward toward the promulgation of State Board of Nursing Regulation, 16 A-51 15, which would permit Licensed Practical Nurses (LPN) to accept oral orders for patient care from a qualified practitioner. This regulation is very important to nursing facility providers to assure that residents receive the best quality care possible in a timely manner. In most long term care facilities, due to the nature of staffing patterns that are most appropriate for this care setting, the LPN has a strong role in care planning, and is often the first line of communication with physicians (or other health care practitioner responsible for the management of the patient's overall care).

As you know, the IRRC act requires the regulation to be promulgated as final within a period of two years from the date of filing as proposed, which is December 1, 2003. Since issues of concern have been resolved and all stakeholder groups (Pennsylvania Association of County Affiliated Homes, Pennsylvania State Nurses Association, PANPHA, Hospital & Healthsystem Association of Pennsylvania, Pennsylvania Health Care Association, and the Pennsylvania Medical Directors Association) are in agreement with the final changes, it is imperative that the regulation moves through the IRRC and the legislature for final review in order to meet the time frames under the IRRC act.

In an environment in which we are especially sensitive to quality and patient safety, having these provisions in regulation will clear up any disparity with regard to the acceptance of oral orders by LPN's in the nursing facility setting.

10/24/2003

Thank you for providing me with the opportunity to comment.

Michele P. Campbell, MSN, RNC
Executive Administrator

Mr. Sandusky
IRRC
333 Market Street, 14th Fl
Harrisburg, PA 17101

Dear Mr. Sandusky:

The purpose of this letter is to ask your support for pending legislation which would permit Licensed Practical Nurses working in a nursing facility to accept oral orders for treatment and medication from a Practitioner of Medicine.

As a physician who has practiced in nursing homes for 40 years and who currently is Medical Director of two nursing facilities, I can assure you that such change in regulations would be very beneficial to residents of nursing homes. It would allow for quicker, safer and more effective treatment for the residents. Quality of care would be significantly enhanced due to the institution of this change.

Having worked closely with LPNs in nursing facilities for many years, I can attest to their general competence to perform this duty in a safe manner.

I know of no group of professionals involved with care delivery to residents of nursing facilities who are not in agreement with this change in the State Board of Nursing Regulations and I would respectfully request that you seriously consider lending your support the change.

Sincerely,

Ray A. Wilson, MD
Vice President Medical Affairs

Subject: LPN Oral Orders

Good Afternoon -

I am writing to ask you support for State Board of Nursing Regulation, 16 A-51 15, which would permit licensed practical nurses (LPN's) to accept oral orders for patient care from a qualified practitioner. During these challenging times of nursing shortages, it is in the best interest of residents of nursing facilities to allow qualified LPN's to accept these orders in order to facilitate the delivery of safe, effective and timely quality care.

LPN's in nursing facilities are instrumental in ensuring that quality care is provided to the many elderly residents of Pennsylvania.

As a licensed Nursing Home Administrator in the State of Pennsylvania, I am committed to ensuring that quality care is provided to the elderly in my charge. I strongly urge you to support this measure to assist us in guaranteeing that quality care is maintained in a timely and effective manner.

INDEPENDENT REGULATORY REVIEW COMMISSION

Mr. John McGinley, Jr.
Chairperson
Independent Regulatory Review Commission
333 Market Street
14th floor
Harrisburg, PA 17101

Dear Mr. McGinley:

The Hospital & Healthsystem Association of Pennsylvania (HAP), on behalf of its members (more than 225 acute and specialty hospitals and health systems in the commonwealth, of which approximately 100 offer nursing home services), appreciates the opportunity to comment on the State Board of Nursing final-form rulemaking which addresses the acceptance of oral orders by Licensed Practical Nurses (16 A-5115).

During these challenging times with workforce shortages, and particularly nursing shortages, it is in the best interest of patients to allow qualified nurses to accept oral orders in order to facilitate the delivery of safe, effective, timely quality care. Having these provisions in regulation will clear up any disparity with regard to the acceptance of oral orders by licensed practical nurses (LPNs) in the nursing home setting.

The Hospital & Healthsystem Association of Pennsylvania supports the State Board of Nursing Regulation, 16 A-5115, which would permit LPNs to accept oral orders for patient care from a qualified practitioner in a nursing home. This regulation is very important to long term care providers to assure that residents receive the best quality care possible in a timely manner. In most facilities, due to the nature of staffing patterns that are most appropriate for this care setting, the LPN has a strong role in care planning, and is often the first line of communication with physicians (or other health care practitioner responsible for the management of the patient's overall care).

For the past several years, this regulation has been proposed, and moved through the regulatory process, but has failed to gain final approval for a variety of reasons. Of particular concern was the extent of LPN education in the area of pharmacology and the taking of oral orders. Following a thorough review of this issue, the State Board of Nursing determined that "LPNs currently receive adequate instruction in pharmacology and critical thinking skills to render the prohibition against the receipt of oral orders other than in urgent circumstances outdated and a barrier to the delivery of safe and timely health care." The regulation has cleared all other

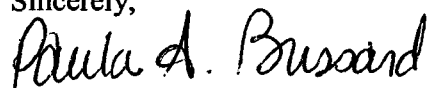

John McGinley, Jr.
October 20, 2003
Page 2

jurisdictions of review, and now requires approval by the standing legislative committees and the Independent Regulatory Review Commission (IRRC).

As you know, the regulation must be promulgated as final within a period of two years from the date of filing as proposed, which is December 1, 2003. Since issues of concern have been resolved and all stakeholder groups (Pennsylvania Association of County Affiliated Homes, Pennsylvania State Nurses Association, PANPHA, The Hospital & Healthsystem Association of Pennsylvania, Pennsylvania Health Care Association, and the Pennsylvania Medical Directors Association) are in agreement with the final changes, it is imperative that the regulation be approved in order to meet the time frames under the IRRC act. We urge timely approval of these regulations.

HAP is committed to ensuring access to quality care and we offer our complete cooperation and assistance in whatever capacity is needed to effectively implement these important regulations.

Sincerely,

PAULA A. BUSSARD
Senior Vice President
Policy and Regulatory Services

October 20, 2003

Dear Mr. Sandusky,

Please support the State Board of Nursing Regulation, 16 A-51 15, Which would let LPN's accept oral orders for our residents from qualified physicians and practitioners. During our time of EXTREME NURSING SHORTAGES, it is necessary to allow qualified LPN's to accept oral orders in order to ensure timely quality care.

Licensed Practical Nurses assume the major daily role in caring for residents in nursing homes. They are the primary line of communication with the residents, their families and physicians. They assume a strong role in care planning and responsibility for the well-being of the residents.

The Board has written that "LPN's currently receive adequate instruction in pharmacology and critical thinking skills to render the prohibition against the receipt of oral orders other than in urgent circumstances outdated and a barrier to the delivery of safe and timely health care." Please work to get legislative approval for this regulation as it has passed all other reviews.

It is crucial that the regulation be finalized by December 1,2003. All issues of concern have been resolved. All interested parties are in agreement with the final regulation. Please help to ensure that the legislative committees and the full legislature approve the regulation by December 1 which is required by the IRRC.

I appreciate all your efforts on behalf of Regulation 16 A 51- 15. Thank you very much.

Sincerely,

Steve Davis

Dear Mr. Sandusky,

I am writing to ask your support for State Board of Nursing Regulation, 16 A-51 15, which would permit licensed practical nurses (LPNs) to accept oral orders for patient care from a qualified practitioner. During these challenging times of nursing shortages, it is in the best interest of patients to allow qualified LPNs to accept oral orders in order to facilitate the delivery of safe, effective and timely quality care.

This regulation is very important to nursing facility providers and physicians to assure that our residents receive the best quality care possible in a timely manner. In most facilities, due to the nature of staffing patterns that are most appropriate for this care setting, the LPN has a strong role in care planning, and is often the first line of communication with physicians, or other health care practitioners responsible for the management of the patient's overall care.

For the past few years, this regulation has been proposed, and moved through the regulatory process, but has failed to gain final approval for a variety of reasons. Of particular concern were the extent of LPN education in the area of pharmacology and the taking of verbal orders. Following a thorough review of this issue, the board determined that "LPNs currently receive adequate instruction in pharmacology and critical thinking skills to render the prohibition against the receipt of oral orders other than in urgent circumstances outdated and a barrier to the delivery of safe and timely health care." The regulation has cleared all other jurisdictions of review, and now requires legislative approval. I am asking for your support of State Board of Nursing Regulation 16 A-51 15.

As you know, the IRRC act requires the regulation to be promulgated as final within a period of two years from the date of filing as proposed, which is December 1, 2003. Since issues of concern have been resolved and all stakeholder groups (PA Association of County Affiliated Homes, PA State Nurses Association, PANPHA, The Hospital and Healthsystem Association of PA, PA Health Care Association, and the PA Medical Directors Association) are in agreement with the final changes, it is imperative that the legislative committees and the full legislature approve the regulation in order to meet the time frames under the IRRC act.

Your support of this measure would be greatly appreciated. I would be delighted to speak to you or your staff about this issue if you need any further information or assistance.

Sincerely,

D Haimowitz MD FACP CMD

Harrisburg, Pennsylvania 17101

Dear Sir:

I am writing this correspondence requesting your support for the State Board of Nursing Regulation, 16 A-51 15, which would permit licensed practical nurses (LPN's) to accept oral orders for patient care from a qualified practitioner.

The Board recognizes that licensed practical nurses receive adequate instruction in pharmacology and critical thinking skills to render the prohibition against the receipt of oral orders other than in urgent circumstances outdated and a barrier to the deliver of safe and timely health care.

Due to meeting the above criteria and the nurse shortage passage of this regulation is paramount to assisting nursing centers with the delivery of safe, effective, and timely quality care.

Again, I request your support of the State Board of Nursing Regulation, 16 A-51 15.

Sincerely,

David I. Christofor
Administrator

INDEPENDENT REGULATORY
REVIEW COMMISSION

Dear Chairman McGinley:

On behalf of the Pennsylvania Association on County Affiliated Homes and the members we serve, I write to convey our support for State Board of Nursing Regulation 16A-5115. PACAH represents all 55 county and county affiliated nursing facilities in the Commonwealth. PACAH is an affiliate of the County Commissioners Association of Pennsylvania. During these challenging times with workforce shortages, and particularly nursing shortages, it is in the best interest of nursing facility residents to allow qualified nurses to accept oral orders in order to facilitate the delivery of safe, effective, timely quality care. Having these provisions in regulation will clear up any disparity with regard to the acceptance of oral orders by Licensed Practical Nurses (LPNs) in the nursing facility setting.

This regulation is very important to nursing facility providers to assure that our residents receive the best quality care possible in a timely manner. In most facilities, due to the nature of staffing patterns that are most appropriate for this care setting, the LPN has a strong role in care planning, and is often the first line of communication with physicians (or other health care practitioner responsible for the management of the patient's overall care).

For the past several years, this regulation has been proposed, and moved through the regulatory process, but has failed to gain final approval for a variety of reasons. Of particular concern was the extent of LPN education in the area of pharmacology and the taking of oral orders. Following a thorough review of this issue, the board determined that "LPNs currently receive adequate instruction in pharmacology and critical thinking skills to render the prohibition against the receipt of oral orders other than in urgent circumstances outdated and a barrier to the delivery of safe and timely health care." The regulation has cleared all other jurisdictions of review, and now requires legislative approval.

Since issues of concern have been resolved and all stakeholder groups (Pennsylvania Association of County Affiliated Homes, Pennsylvania State Nurses Association, PANPHA, The Hospital & Healthsystem Association of Pennsylvania, Pennsylvania Health Care Association, and the Pennsylvania Medical Directors Association) are in agreement with the final changes, it is imperative that the Independent Regulatory Review Commission approve the regulation in order to meet the time frames under the IRRC act.

I urge the commission to approve the timely and needed regulatory change. I would be happy to provide additional information if needed.

Sincerely,

EMBARGOED MATERIAL

Dear Mr. McGinley:

The Pennsylvania Medical Directors Association, appreciates the opportunity to comment on the State Board of Nursing final-form rulemaking which address the acceptance of oral orders by Licensed Practical Nurses (16 A-5115). The Pennsylvania Medical Directors Association (PMDA) is the official state chapter of the American Medical Directors Association, and represents physicians practicing in the long-term care setting. The mission of PMDA is to improve the quality of care for Pennsylvania's long-term care residents.

During these challenging times with workforce shortages, and particularly nursing shortages, it is in the best interest of patients to allow qualified nurses to accept oral orders in order to facilitate the delivery of safe, effective, timely quality care. Having these provisions in regulation will clear up any disparity with regard to the acceptance of oral orders by LPNs in the nursing facility setting.

PMDA supports the State Board of Nursing Regulation, 16 A-5115, which would permit LPNs to accept oral orders for patient care from a qualified practitioner. This regulation is very important to nursing facility providers to assure that our residents receive the best quality care possible in a timely manner. In most facilities, due to the nature of staffing patterns that are most appropriate for this care setting, the LPN has a strong role in care planning, and is often the first line of communication with physicians (or other health care practitioner responsible for the management of the patient's overall care). We believe giving verbal orders directly to the nurse most involved in the care of a resident is likely to actually reduce the potential for medical errors.

For the past several years, this regulation has been proposed, and moved through the regulatory process, but has failed to gain final approval for a variety of reasons. Of particular concern was the extent of LPN education in the area of pharmacology and the taking of oral orders. Following a thorough review of this issue, the board determined that "LPNs currently receive adequate instruction in pharmacology and critical thinking skills to render the prohibition against the receipt of oral orders other than in urgent circumstances outdated and a barrier to the delivery of safe and timely health care." The regulation has cleared all other jurisdictions of review, and now requires legislative approval.

As you know, the regulation must be promulgated as final within a period of two years from the date of filing as proposed, which is December 1, 2003. Since issues of concern have been resolved and all stakeholder groups (Pennsylvania Association of County

Affiliated Homes, Pennsylvania State Nurses Association, PANPHA, The Hospital & Healthsystem Association of Pennsylvania, Pennsylvania Health Care Association, and the Pennsylvania Medical Directors Association) are in agreement with the final changes, it is imperative that the regulation be approved in order to meet the time frames under the IRRC act.

We are committed to ensuring access to quality care and we offer our complete cooperation and assistance in whatever capacity is needed to effectively implement these important regulations.

Sincerely,
