RE: Commercial Manure Hauler and Broker Certification

To Whom It May Concern:

I am an independent farmer and owner/operator of a 3200 head Hog Finishing barn. My goal for my family is to continue farming so that my children may grow up on a farm as I did. I understand that we are stewards of the land, and I plan to take care of my land, and neighboring farmers' land. I feel that these proposed regulations are too complex. I feel confident that all farmers are wise with their land application of manure. It is not profitable for our operations to put more manure on than needed. Farming is very time consuming and we need to streamline our efforts, not complicate them even more by adding more and more requirements.

Sincerely,

Concerned Farmer in Lancaster County
