INDEPENDENT REGULATORY
REVIEW COMMISSION

To Johan Berger,

This letter is to inform you that the proposed Rulemaking or anything similar would not be acceptable for us. We are a small family farm that got involved in hauling manure for a side income. Our main business is dairy and crop farming. The extra hauling we do with our equipment is to make it feasible to use the equipment for our own operation. These restrictions or similar would require us to quit hauling. If you and the state are against the small family farms, please let us know.

I would suggest meetings for those who would be required to be certified so they can be notified as to what is being proposed. Also all fees for and involving certification should be paid by the "general public" or those imposing these regulations.

Sincerely,
Oale L. Metzler

Please respond to this letter. Thank you
