P.O. Box 2063
Harrisburg, PA 17105-2063

Dear Comments Environmental Quality Board (EQB):

As a concerned citizen of Pennsylvania, I support the proposed amendments to the rules governing the Pennsylvania Clean Vehicles Program. I also support full implementation of the Clean Vehicles Program, as recommended by the Pennsylvania Department of Environmental Protection (DEP).

The federal Clean Air Act requires Pennsylvania to cut pollution from cars and trucks, and the proposed amendments to the Pennsylvania Clean Vehicles Program are necessary to do that.

There are 37 counties in Pennsylvania with smog pollution that is higher than allowed by health-based federal standards. Unless we reduce vehicle emissions, there will be no room for industry to expand in those counties.

Ten other states have already adopted California low emission vehicle standards, the same standards the Pennsylvania program has.

Action is required to combat global warming - and reducing greenhouse gas emissions is a critical part of that.

Thank you for the opportunity to provide comment on this program that is critical to cleaning our air, safeguarding our health, keeping our economy strong, and providing consumers with better vehicle options.

Sincerely,

Erika M. Ingato

Harrisburg, PA 17105-2063

Dear Comments Environmental Quality Board (EQB):

As a concerned citizen of Pennsylvania, I support the proposed amendments to the rules governing the Pennsylvania Clean Vehicles Program. I also support full implementation of the Clean Vehicles Program, as recommended by the Pennsylvania Department of Environmental Protection (DEP).

The federal Clean Air Act, as it should, requires Pennsylvania to cut pollution from cars and trucks, and the proposed amendments to the Pennsylvania Clean Vehicles Program are necessary to do that.

As is too often the case, federal standards pertaining to low emission vehicles don't go far enough to improve Pennsylvania's ability to comply with the Clean Air Act.

Vehicles that would be certified as acceptable under the Pennsylvania Clean Vehicles Program are not more expensive than vehicles that meet the federal low emission vehicle standards.

Clean cars are more fuel-efficient than heavy polluters. We need to promote their use as quickly as we can.

Cleaner vehicles will benefit the more than 1,000,000 Pennsylvanians who suffer from breathing problems that are made worse by air pollution. That will also help us save on health care costs.

Ten other states have already adopted California low emission vehicle standards, the same standards the Pennsylvania program has. No one can say that this program cannot be made to work here. It works elsewhere already.

Thank you for the opportunity to provide comment on this program that is critical to cleaning our air, safeguarding our health, keeping our economy strong, and providing consumers with better vehicle options.

Sincerely,

Grayfred B. Gray, J.D.

P.O. Box 2063
Harrisburg, PA 17105-2063

Dear Comments Environmental Quality Board (EQB):

As a concerned citizen of Pennsylvania, I support the proposed amendments to the rules governing the Pennsylvania Clean Vehicles Program. I also support full implementation of the Clean Vehicles Program, as recommended by the Pennsylvania Department of Environmental Protection (DEP).

Federal standards pertaining to low emission vehicles don't go far enough to improve Pennsylvania's ability to comply with the Clean Air Act.

Thank you for the opportunity to provide comment on this program that is critical to cleaning our air, safeguarding our health, keeping our economy strong, and providing consumers with better vehicle options.

Sincerely,

Monika McDole-Russell

Comments - Environmental Quality Board (EQB)
16th Floor, Rachel Carson State Office Building
P.O. Box 2063
Harrisburg, PA 17105-2063

Dear Comments Environmental Quality Board (EQB):

As a concerned citizen of Pennsylvania, I support the proposed amendments to the rules governing the Pennsylvania Clean Vehicles Program. I also support full implementation of the Clean Vehicles Program, as recommended by the Pennsylvania Department of Environmental Protection (DEP).

There are 37 counties in Pennsylvania with smog pollution that is higher than allowed by health-based federal standards. Unless we reduce vehicle emissions, there will be no room for industry to expand in those counties.

Vehicles that would be certified as acceptable under the Pennsylvania Clean Vehicles Program are not more expensive than vehicles that meet the federal low emission vehicle standards.

Cleaner vehicles will benefit the more than 1,000,000 Pennsylvanians who suffer from breathing problems that are made worse by air pollution.

Thank you for the opportunity to provide comment on this program that is critical to cleaning our air, safeguarding our health, keeping our economy strong, and providing consumers with better vehicle options.

Sincerely,

Bill Waddington
