

**Comments in Support of  
The Pennsylvania Clean Vehicles Program**

Environmental Quality Board  
P. O. Box 8477  
Harrisburg, PA 17105-8477

Dear Sir or Madam:

I am writing to voice my full support for the Pennsylvania Clean Vehicles Program, and to urge that it be implemented as quickly as possible.

Cars and trucks are a significant source of air pollution, contributing approximately one third of the region's smog-forming emissions. The Pennsylvania Clean Vehicles Program would reduce pollution from vehicles more quickly and thoroughly than weaker federal standards. These pollution reductions are crucial for improving air quality and protecting public health in the state.

Thirty-seven counties across Pennsylvania still do not meet the federal government's basic air quality standards. The Scranton metro area has recently been ranked the nation's worst for people living with asthma, and other major cities in the state have also been rated very poorly by asthma experts. To put the matter simply: Pennsylvanians have already waited too long for clean, healthful air.

The state should have implemented the Clean Vehicles Program already. I urge the Department of Environmental Protection to move forward getting the program up-and-running as soon as it can.

Dear Sir or Madam:

I am writing to voice my full support for the Pennsylvania Clean Vehicles Program, and to urge that it be implemented as quickly as possible.

Cars and trucks are a significant source of air pollution, contributing approximately one third of the region's smog-forming emissions. The Pennsylvania Clean Vehicles Program would reduce pollution from vehicles more quickly and thoroughly than weaker federal standards. These pollution reductions are crucial for improving air quality and protecting public health in the state.

Thirty-seven counties across Pennsylvania still do not meet the federal government's basic air quality standards. The Scranton metro area has recently been ranked the nation's worst for people living with asthma, and other major cities in the state have also been rated very poorly by asthma experts. To put the matter simply: Pennsylvanians have already waited too long for clean, healthful air.

The state should have implemented the Clean Vehicles Program already. I urge the Department of Environmental Protection to move forward getting the program up-and-running as soon as it can.

Thirty-seven counties across Pennsylvania still do not meet the federal government's basic air quality standards. The Scranton metro area has recently been ranked the nation's worst for people living with asthma, and other major cities in the state have also been rated very poorly by asthma experts. To put the matter simply: Pennsylvanians have already waited too long for clean, healthful air.

The state should have implemented the Clean Vehicles Program already. I urge the Department of Environmental Protection to move forward getting the program up-and-running as soon as it can.

Dear Sir or Madam:

I am writing to voice my full support for the Pennsylvania Clean Vehicles Program, and to urge that it be implemented as quickly as possible.

Cars and trucks are a significant source of air pollution, contributing approximately one third of the region's smog-forming emissions. The Pennsylvania Clean Vehicles Program would reduce pollution from vehicles more quickly and thoroughly than weaker federal standards. These pollution reductions are crucial for improving air quality and protecting public health in the state.

Thirty-seven counties across Pennsylvania still do not meet the federal government's basic air quality standards. The Scranton metro area has recently been ranked the nation's worst for people living with asthma, and other major cities in the state have also been rated very poorly by asthma experts. To put the matter simply: Pennsylvanians have already waited too long for clean, healthful air.

The state should have implemented the Clean Vehicles Program already. I urge the Department of Environmental Protection to move forward getting the program up-and-running as soon as it can.

Harrisburg, PA 17105-8477

Dear Sir or Madam:

I am writing to voice my full support for the Pennsylvania Clean Vehicles Program, and to urge that it be implemented as quickly as possible.

Cars and trucks are a significant source of air pollution, contributing approximately one third of the region's smog-forming emissions. The Pennsylvania Clean Vehicles Program would reduce pollution from vehicles more quickly and thoroughly than weaker federal standards. These pollution reductions are crucial for improving air quality and protecting public health in the state.

Thirty-seven counties across Pennsylvania still do not meet the federal government's basic air quality standards.
