

TO: Members of the Environmental Quality Board
RE: Pennsylvania Clean Vehicles Program

I support the implementation of the PA Clean Vehicles Program and bringing cleaner cars to Pennsylvania. This program would help curb smog and global climate change pollution which poses public health and environmental threats to our citizens. PA has some of the worst air quality in the country and this program is an excellent first step in moving us towards a cleaner and safer place to live.

I'm trying to do my part by driving a hybrid.

MAR 24

Comments in Support of
The Pennsylvania Clean Vehicles Program

Environmental Quality Board
P. O. Box 8477
Harrisburg, PA 17105-8477

Dear Sir or Madam:

I am writing to voice my full support for the Pennsylvania Clean Vehicles Program, and to urge that it be implemented as quickly as possible.

Cars and trucks are a significant source of air pollution, contributing approximately one third of the region's smog-forming emissions. The Pennsylvania Clean Vehicles Program would reduce pollution from vehicles more quickly and thoroughly than weaker federal standards. These pollution reductions are crucial for improving air quality and protecting public health in the state.

Thirty-seven counties across Pennsylvania still do not meet the federal government's basic air quality standards. The Scranton metro area has recently been ranked the nation's worst for people living with asthma, and other major cities in the state have also been rated very poorly by asthma experts. To put the matter simply: Pennsylvanians have already waited too long for clean, healthful air.

The state should have implemented the Clean Vehicles Program already. I urge the Department of Environmental Protection to move forward getting the program up-and-running as soon as it can.

Subject: Clean Vehicle Program 25 PA.CODE CHS.121 AND 126

Dear Members of the Environmental Quality Board,

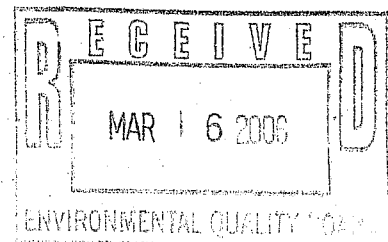

My family, community, and I deserve to live in a state where we can breathe clean air. Please help make Pennsylvania a safe and healthy place to live by supporting the Department of Environmental Protection's proposed changes to the Pennsylvania Clean Vehicle Program.

In 2003, Pennsylvania was ranked 11th in the nation for the worst smog pollution from cars and trucks while 37 PA counties, including all of southeastern Pennsylvania, failed to meet federal air quality standards. 'Smog' pollution from cars and trucks triggers an estimated 370,000 asthma attacks annually. This puts our families at risk.

I urge the Environmental Quality Board to support the DEP's proposed changes to the PA Clean Vehicle Program.

Sincerely,
[your name]

The Scranton metro area has recently been ranked the nation's worst for people living with asthma, and other major cities in the state have also been rated very poorly by asthma experts. To put the matter simply: Pennsylvanians have already waited too long for clean, healthful air.

The state should have implemented the Clean Vehicles Program already. I urge the Department of Environmental Protection to move forward getting the program up-and-running as soon as it can.

**Comments in Support of
The Pennsylvania Clean Vehicles Program**

Environmental Quality Board
P. O. Box 8477
Harrisburg, PA 17105-8477

Dear Sir or Madam:

I am writing to voice my full support for the Pennsylvania Clean Vehicles Program, and to urge that it be implemented as quickly as possible.

Cars and trucks are a significant source of air pollution, contributing approximately one third of the region's smog-forming emissions. The Pennsylvania Clean Vehicles Program would reduce pollution from vehicles more quickly and thoroughly than weaker federal standards. These pollution reductions are crucial for improving air quality and protecting public health in the state.

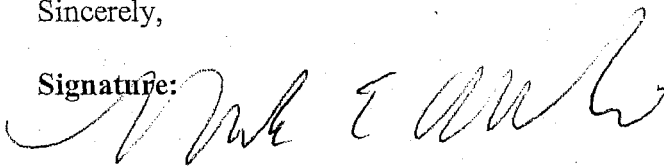

Thirty-seven counties across Pennsylvania still do not meet the federal government's basic air quality standards. The Scranton metro area has recently been ranked the nation's worst for people living with asthma, and other major cities in the state have also been rated very poorly by asthma experts. To put the matter simply: Pennsylvanians have already waited too long for clean, healthful air.

The state should have implemented the Clean Vehicles Program already. I urge the Department of Environmental Protection to move forward getting the program up-and-running as soon as it can.

The Pennsylvania Clean Vehicles Program**

P. O. Box 8477
Harrisburg, PA 17105-8477

Dear Sir or Madam:

I am writing to voice my full support for the Pennsylvania Clean Vehicles Program, and to urge that it be implemented as quickly as possible.

Cars and trucks are a significant source of air pollution, contributing approximately one third of the region's smog-forming emissions. The Pennsylvania Clean Vehicles Program would reduce pollution from vehicles more quickly and thoroughly than weaker federal standards. These pollution reductions are crucial for improving air quality and protecting public health in the state.

Thirty-seven counties across Pennsylvania still do not meet the federal government's basic air quality standards. The Scranton metro area has recently been ranked the nation's worst for people living with asthma, and other major cities in the state have also been rated very poorly by asthma experts. To put the matter simply: Pennsylvanians have already waited too long for clean, healthful air.

The state should have implemented the Clean Vehicles Program already. I urge the Department of Environmental Protection to move forward getting the program up-and-running as soon as it can.

Additional Comments (if any):

Sincerely,

TO: Members of the Environmental Quality Board
RE: Pennsylvania Clean Vehicles Program

I support the implementation of the PA Clean Vehicles Program and bringing cleaner cars to Pennsylvania. This program would help curb smog and global climate change pollution which poses public health and environmental threats to our citizens. PA has some of the worst air quality in the country and this program is an excellent first step in moving us towards a cleaner and safer place to live.

*We are the cause of
most if not all of our air
pollution! Let's help & work
TOGETHER*

Environmental Quality Board
P. O. Box 8477
Harrisburg, PA 17105-8477

Dear Environmental Quality Board,

I am writing to urge the state to move ahead as quickly as possible in implementing the Pennsylvania Clean Vehicles Program, and its clean air standards for cars and trucks that go beyond weaker federal requirements.

Pennsylvania ranks among the worst states in the country when it comes to air pollution. Our air pollution is plaguing our state and leading to a host of public health problems, including asthma attacks in children and aggravation of respiratory ailments in adults.

One of the worst sources of this pollution is cars and trucks. Technology exists today that would allow cars and trucks to run cleaner and significantly reduce our air pollution problem.

By moving as quickly as possible to implement the Pennsylvania Clean Vehicles Program we would be able to significantly reduce our air pollution problem --emissions of smog-forming pollution from cars and trucks would be cut by 10 percent, toxic benzene pollution up to 15 percent and global warming emissions would drop by nearly 25 percent by 2025, as compared to reductions under the weaker federal program being considered. And an added benefit of the standards is that they would likely make cars go farther on a gallon of gas, saving Pennsylvanians money when they fill up at the gas pump.

Again, I urge the state to move forward and implement the Pennsylvania Clean Vehicles Program.

We should not settle for the weaker federal requirements. We deserve better.

Dear Environmental Quality Board Member:

I am writing to urge the state to move ahead as quickly as possible in implementing the Pennsylvania Clean Vehicles Program. Its clean air standards for cars and trucks go beyond the much weaker federal requirements.

- ◆ Pennsylvania ranks among the worst states in the country when it comes to air pollution. Our air pollution is plaguing our state and leading to a host of public health problems, including asthma attacks in children and aggravation of respiratory ailments in adults.
- ◆ One of the worst sources of this pollution is cars and trucks. Technology exists today that would allow cars and trucks to run cleaner and significantly reduce our air pollution problem.

By moving as quickly as possible to implement the Pennsylvania Clean Vehicles Program we would be able to significantly reduce our air pollution problem -- emissions of smog-forming pollution from cars and trucks would be cut by 10 percent, toxic benzene pollution up to 15 percent and global warming emissions would drop by nearly 25 percent by 2025, as compared to reductions under the weaker federal program being considered. And an added benefit of the standards is that they would likely make cars go farther on a gallon of gas, saving Pennsylvanians money when they fill up at the gas pump.

I want clean air for my children, myself and all Pennsylvanians!

We should not settle for the weaker federal requirements. We deserve better.

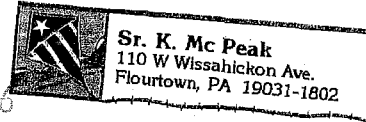

Sincerely,

Dear Environmental Quality Board Member:

I am writing to urge the state to move ahead as quickly as possible in implementing the Pennsylvania Clean Vehicles Program. Its clean air standards for cars and trucks go beyond the much weaker federal requirements.

- ◆ Pennsylvania ranks among the worst states in the country when it comes to air pollution. Our air pollution is plaguing our state and leading to a host of public health problems, including asthma attacks in children and aggravation of respiratory ailments in adults.
- ◆ One of the worst sources of this pollution is cars and trucks. Technology exists today that would allow cars and trucks to run cleaner and significantly reduce our air pollution problem.

By moving as quickly as possible to implement the Pennsylvania Clean Vehicles Program we would be able to significantly reduce our air pollution problem -- emissions of smog-forming pollution from cars and trucks would be cut by 10 percent, toxic benzene pollution up to 15 percent and global warming emissions would drop by nearly 25 percent by 2025, as compared to reductions under the weaker federal program being considered. And an added benefit of the standards is that they would likely make cars go farther on a gallon of gas, saving Pennsylvanians money when they fill up at the gas pump.

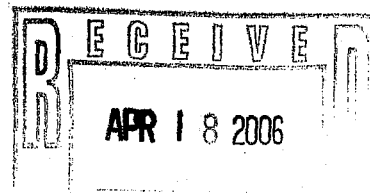

I want clean air for my children, myself and all Pennsylvanians!

We should not settle for the weaker federal requirements. We deserve better.

Sincerely,

Dear Environmental Quality Board,

I am writing to urge the state to move ahead as quickly as possible in implementing the Pennsylvania Clean Vehicles Program, and its clean air standards for cars and trucks that go beyond weaker federal requirements.

Pennsylvania ranks among the worst states in the country when it comes to air pollution. Our air pollution is plaguing our state and leading to a host of public health problems, including asthma attacks in children and aggravation of respiratory ailments in adults.

One of the worst sources of this pollution is cars and trucks. Technology exists today that would allow cars and trucks to run cleaner and significantly reduce our air pollution problem.

By moving as quickly as possible to implement the Pennsylvania Clean Vehicles Program we would be able to significantly reduce our air pollution problem --emissions of smog-forming pollution from cars and trucks would be cut by 10 percent, toxic benzene pollution up to 15 percent and global warming emissions would drop by nearly 25 percent by 2025, as compared to reductions under the weaker federal program being considered. And an added benefit of the standards is that they would likely make cars go farther on a gallon of gas, saving Pennsylvanians money when they fill up at the gas pump.

Again, I urge the state to move forward and implement the Pennsylvania Clean Vehicles Program.

We should not settle for the weaker federal requirements. We deserve better.

Sincerely,

Alan Dodges
