

PENNSYLVANIA CLEAN VEHICLE PROGRAM

(PETITION)

TO: ENVIRONMENTAL QUALITY BOARD

We the undersigned wish to express our concern about the air pollution which plagues our state, leading to a host of public health problems including asthma in children and aggravation of respiratory ailments in adults. One of the worst sources of pollution is cars and trucks. Technology exists today that would allow cars and trucks to run cleaner and significantly reduce our air pollution problems.

At present, at least nine states have passed laws concerning emission standards that go beyond the present weaker federal requirements. And yet Pennsylvania consistently ranks nationally among the ten worst states when it comes to air pollution of all kinds. We urge you to take action that will help correct this situation by supporting the proposed changes to the PA Clean Vehicle Program.

I support the implementation of the PA Clean Vehicles Program and bringing cleaner cars to Pennsylvania. This program would help curb smog and global climate change pollution which poses public health and environmental threats to our citizens. PA has some of the worst air quality in the country and this program is an excellent first step in moving us towards a cleaner and safer place to live.
