Pennsylvania Environmental Quality Board

Ladies and Gentlemen:

I write in support of the Pennsylvania Clear Quality Program, and I strongly urge its immediate implementation.

Pennsylvania ranks consistently as one of the 10 worst states in air quality. We can and must do better! Our personal health and the future Pennsylvania and the planet depend upon it and similar programs implemented elsewhere. Pennsylvania must do its part.

I am a long-time registered Republican, but I do not support the ^{destructive} environmental policy of the Bush Administration.

Let's base our environmental policy on the ~~weight~~ ^{weight} of scientific study and the welfare of our citizens, not special interests and their lobbyists.

Very truly yours,
Jeffrey T. Chappelle
