

To: Mr. Tom With May Concern

The Clean Air Program has met  
greatly interested. I am 58 years old  
and have lived in Philadelphia's almy  
life. Living near railroads and being  
exposed to heavy traffic. Because of  
the smog - causing pollution in Phila  
I am suffering from lungs that are  
so much I need oxygen for most of the  
day. Pennsylvania is a wonderful state  
and deserves more action and higher  
standards. I hope the Dept of Environment  
protection will be successful in preventing  
illness and premature death. The Clean Air  
Program has great promise

Sincerely  
Sister Cordata D'Amico
