TO: Members of the Environmental Quality Board RE: Pennsylvania Specific Mercury Reduction Rule The Environmental Protection Agency's (EPA) federal mercury rule will result in more mercury our air and water than simply fully enforcing the Clean Air Act. PA is currently the 2nd worst polluter of mercury from coal-fired power plants in the country. PA coal is also higher than most in chlorine content which makes it more apt to fall closer to it's source. Our children deserve to grow up in a state that leads the way on reducing mercury pollution. I encourage the adoption of the Department of Environmental Protection's (DEP) proposed PA specific mercury rule which aims to reduce mercury pollution by 80% in 2010 and 90% in 2015 at all applicable sources, and prohibits the trading or netting of mercury pollution credits. We have the opportunity to protect our families' health and safety by implementing a PA specific mercury reduction rule as soon as possible for the sake of our community and our children's health. This state is too capable & too resourceful to tolerate a "2nd worse" status - protect our kids!!! Adopt the proposed mercury rule!!!

^^

Please contact me if you have any questions.  
Sincerely,  
Marjorie L. Hughes
