58

When I was in Jr. High School
(grade 7 and 8) 58 years ago

We talked about Mercury pollution
and poisoning.

Then we knew most of the
mercury was being released in
the air by smoke stacks
of COAL fires providing
power at manufacturing plants.

BIGGEST polluters were POWER
plants providing ~~most~~ electric
to our new ^{13"} round screen T.V.'s,
and new refridg w/ FREEZER CHEST
for food as well as ice cubes.

To Lawmakers

Don't tell us YOU were
not in office at that time
and that is not YOUR problem.

You grew up knowing the
WORLD had this problem.

* Solving the problem is
way over due.

* Enough Studies have been done.

* Enough TIME for manufacturer
and POWER Plants.

* It is time to ORDER by LAW
that the best and most MUST be
done to STOP it - NOW!
