Patricia's Mercury Hearing Statement

Hello! My name is Patricia Lomden and I'm from the Art Museum Area of Philadelphia. First I want to say thank you so much for allowing me to testify at this hearing today! I would like to say that mercury pollution affects women my age because it affects our children and future children. Because of this fact, I support the Department of Environmental Protection's state-specific mercury reduction rule, which would cut mercury pollution from Pennsylvania's coal-fired power plants 90% by 2015. Thanks once again!
