Hi, My Name is Marguerite Reeves
and I have lived in the state
of Pennsylvania all my life, I truly
respect the Dep group, for making people
aware of what is in our drinking
water. I do ^{have} two great children - a ten
year Old girl and a 11 year Old boy who
I love very much, and I care very
much about what goes in their bodies
my daughter does have a learning
Disability she was born with it.
It makes me wonder if, any mercury
was in my system while I carried her
for nine months, could be the reason,
also there has been times when
my son filled a glass of water to
drink and looked at me and said mom
what is wrong with ^{the} water, its cloudy
a orange color. I really hope
something can be done

Sincerely
Mrs.
Marguerite
Reeves

Dear EQB,

I am writing out of concern for the health of all of us, and the dangers of mercury emissions. Since PA. is # 2 in the U.S. for such emissions from coal-fired power plants, I should not be shocked that my neighbor has mercury poisoning, but I am. And I work at a school for children with problems, including learning disabilities and autism spectrum disorders. We get more referrals all the time! No one knows the causes yet of autism, but it's something very pervasive in our daily life - perhaps mercury, or

Re: Mercury in Pa waterways. (#7-405)
Mercury Emissions Reduction for Electric Generating units

Gentlemen,

You need to pass legislation to reduce the level of Mercury in Pa's waterways. It is important

for the environment and the wellbeing of the next generation.

Powerplants should reduce their output of Hg by at least 90% by 2015 if not before. The technology is there to do it. It just costs money.

Dear Sir/Ma'am -

Although the issues of environmental health are more often than not pushed to the rear of one's political agenda, I would be remiss to not urge your organization to examine this issue with emphatic attention. As a woman and a mother, the issue of mercury levels in our air and drinking water are of a daily concern. The meals that I feed my children and the beverages that they consume are tainted with near toxic levels of this deadly poison. Mercury levels in the state of Pennsylvania are, appallingly, the second highest of any other state in the country.

Along with this statistic comes an evergrowing list of birth and health defects.

Being someone who deeply values the ability to procreate and looks forward to a day when my children will decide to exercise their reproductive rights and potentially give me healthy grandbabies - I must encourage you to support the D&P proposal to require coal fired power plants to reduce these harmful emissions to 90% by 2015.

Since Senator Santorum is SO concerned with my reproductive activities (and those of all ~~women~~ womankind) - perhaps he would agree that by keeping our uterus's healthy - we may reduce the number of women who feel forced to seek out abortion based on the devastating event of an unhealthy fetus.

Thank You
Doreen C. Miller

EQB,

The levels of mercury, a dangerous neurotoxin, in PA are appalling. To continue to allow companies to pump toxic chemicals into our environment is nothing less than murder. It is akin to shooting yourself in the foot as well - what economy could survive in a time when everyone has 1,000s of dollars of medical bills a year and pays 100s more to filter the air and water, and to import uncontaminated foods, in their homes?

Vote in the DFP proposal to require power companies to reduce mercury by 90% by 2015 - it's the only way.

Haverhill, MA 01833

Dear whomever,

My name is Amanda O'Brien and I'm writing to you to express the fact that I am appalled at the way you think it ok for mercury and other poisons to be produced in our drinking water. I myself used to drink tap water and always felt tired just sickly all the time as soon as I started drinking bottled water I started to notice that wasn't as tired anymore and because of that I was able to walk and begin other activities.

I would appreciate it if you would cut the coal fired power plants to cut their mercury emission dramatically immediately as there are enough problems on the world and this can be easily resolved. There are also electric generating units that emit mercury into the air that also needs reducing.

I find it appalling that anyone to support power plants to get away with this but I guess if you have enough money you can get away with anything you wish.

Resident yours sincerely
Amanda.

August 10, 2006

Environmental Quality Boards

I am writing to ask my representatives to take attention immediately to the issue of reduction of the mercury emissions by 90% for 2015. I ask that this be seen as an investment in our future generations health.

I oppose any pollution trading plan. Be sure all coal plants reduce their mercury pollution.

"Mercury Emissions Reduction Requirements for Electric Generating Units (E-GUs)"

(Mrs) Janet Adams

Dear Environmental Quality Board:-

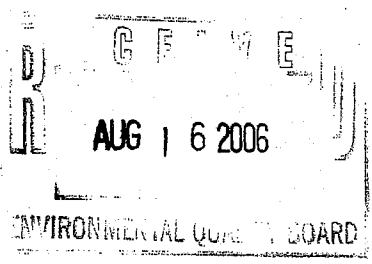

I am extremely concerned about the levels of mercury here in our water. We are the 2nd worst state in the nation, and we must change our policy! I support the DEP proposal for required 90% reduction in mercury emissions by 2015. We must act now!

Thank you,

William S. Reynolds

240 Berkley Lane

Medick PA 19063

Dear Environmental Quality Board:

I was shocked to find out that Pennsylvania is the second highest levels of mercury in the free nation. I am concerned for the children of this state who are being exposed to this dangerous toxin. Therefore, I support the DEP proposal to require coal plants to reduce their mercury emissions by 90% by the year 2015. This plan will oppose pollution fighting, which will fail to solve the problem and allow plants to skirt their reductions instead of being held accountable.

Thank you,

Charlotte Magee
