To Whom It May Concern:

I am very happy to see that there are amended dog law regulations being considered that support humane treatment: doubling cage requirements, more exercise, better temp. control, lighting, air ventilation + especially, denying Kennel licenses for those convicted of animal cruelty w/in the past 10 yrs. I urge you to support + pass these amended regulations! In addition, I hope that you will consider adding a regulation against permanent tethering as the primary closure. It's really about time that PA improved their regulations re: the humane treatment of dogs.

Thank you!

Sincerely,

Karen Sattler
