

Name = Tammi Williams

State = Colorado

Email Address = Catsonkeys@comcast.net

Message = I support the changes to the commercial dog regulations submitted by the Coalition Against Misery. The draft regulations that were recently released by the Pennsylvania Department of Agriculture do not adequately address the issues of temperature control, cage conditions and humane breeding practices.

Every kennel must be required to have a visible, safe source of heat and air-conditioning. Additionally, the regulations should limit the number of dogs that can be kept in one cage. And finally, we ask that you include breeding regulations consistent with those established by reputable breed clubs.

Please take steps to ensure that the new regulations provide humane conditions for the dogs.

Thank you

Name = Barbara Dobbins

State = Iowa

Email Address = thimble_mom@hotmail.com

Message = I support the changes to the commercial dog regulations submitted by the Coalition Against Misery. The draft regulations that were recently released by the Pennsylvania Department of Agriculture do not adequately address the issues of temperature control, cage conditions and humane breeding practices.

Every kennel must be required to have a visible, safe source of heat and air-conditioning. Additionally, the regulations should limit the number of dogs that can be kept in one cage. And finally, we ask that you include breeding regulations consistent with those established by reputable breed clubs.

Please take steps to ensure that the new regulations provide humane conditions for the dogs.

Every kennel must be required to have a visible, safe source of heat and air-conditioning. Additionally, the regulations should limit the number of dogs that can be kept in one cage. And finally, we ask that you include breeding regulations consistent with those established by reputable breed clubs.

Please take steps to ensure that the new regulations provide humane conditions for the dogs.

Thank you

Message = I support the changes to the commercial dog regulations submitted by the Coalition Against Misery. The draft regulations that were recently released by the Pennsylvania Department of Agriculture do not adequately address the issues of temperature control, cage conditions and humane breeding practices.

Every kennel must be required to have a visible, safe source of heat and air-conditioning. Additionally, the regulations should limit the number of dogs that can be kept in one cage. And finally, we ask that you include breeding regulations consistent with those established by reputable breed clubs.

We have adopted a 4 year old that was rescued from a puppy mill. Her feet are permanently damaged from living on wire. She sleeps with her head propped up on whatever is available, (at first it was by sticking her nose through the wire in her crate; now we provide her with a pillow) a habit acquired due to her finding a solution to sleeping in her own feces & sometimes the feces of those in cages above. She learned how to drink water by watching our other long-time pet. She only knew to get a drink from water bottle used for rabbits, guinea pigs, etc. Many of her teeth were rotten and had to be removed. Ask yourself, isn't this abuse? Wake up Pennsylvania and take the lead in stopping this misery. Take a chance and take it now. Become the nation's conscience.

Thank you
