INDEPENDENT REGULATORY  
REVIEW COMMISSION

I very much approve of the amended Dog Law Regulations. They are not excessive or overly burdensome to any dog breeding business that would want to try and provide a reasonable quality product. I had read where they wanted this extra space so a dog could lie on his back with his feet extended in the air, and the comment was made that was a ridiculous request because only dead dogs lay like that. Bologny, My 14 yr. old Lab mix, adopted from the Humane League of Lane. LOVED to lay on her back with her feet in the air, and did so, on our leather Lazy Boy sofa for years - until her death, NOT after. I don't feel any of these amended regulations are excessive if one cares about the product they are producing.

Sincerely,  
Diana Steidler
