INDEPENDENT REGULATORY
REVIEW COMMISSION

Dear Ms Bender,

I am vigorously opposed to the new set of laws you are trying to enact. By doing this you will support puppy mills and commercial breeders! These breeders are the ones that appear on the news almost daily for abuse and neglect of thier "breeding stock" They do not test for health problems and most are never touched by human hands. Why can't you just enforce the existing laws?

By enacting these laws you only hurt animals in need and business who need the revenue. People that open thier homes and hearts offering these animals a safe haven will suffer as well.

True breeders test for genetic problems before breeding. Healthy, home raised dogs make for better companions. Those raised in commercial kennels hardly ever get a loving hand before being shipped "off to market". Most times these are the dogs who are vicious and wind up being euthanized after biting someone. Can't you see how these new laws can only hurt the public both economicly and for saftey?

As a resident of PA I oppose this proposed new law!
