Recommendations to Dog Law proposals

2007 FEB 28 PM 2:41

1. All expenditures grandfathered.
2. The need of citations to cover operating costs Encourages citations.
3. Do a fair and complete job of enforcing present regulations instead of adding excessive new ones.
4. Are new proposed regulations enforceable? ie.
5. Too much time on paper work instead of with dogs.
6. Only two ways to exercise dogs in proposal. What about swimming, field work, agility, mechanical and with other dogs?
7. Will we regulate kennels out of business and inport dogs like what is happening to the manufacturing in U.S.A.? Or use moderation and control locally.
8. Is an attachment to the primary enclosure part of the primary enclosure?
9. There is no communication between the Department and the kennel owners.
10. 21-21 [e] too restrictive, especially removable.
11. 21-23 [e] observed and supervised. This would eliminate kennels.
12. 21-23 [g] [v] [a] Too much detail
13. 21-24 [b] 50o F. We are talking about dogs? Insulated dog box.
 - 21-24 [b7] Painted in a light color or insulated box
 - [b11] 5' grow and weeds. Dogs love.
 - [d] Vinyl type coating- stainless or powder-coated?
 - 21-24 ½ round pipe installed to permit dog to walk through. Could this cause injuries?
 - 21-25 [d] Slab temperature 35o to 55o . Heat the slab? What about wire temperatures. An elevated resting board.
 - [e] Cooling . Have to A.C. all inside kennels. Move the dogs outside.
 - 21-26 [e] Ground level ventilation. This is another expense that wont be utilized.

Let cool heads prevail, get bad kennels out and have good operations, and supply quality dogs at a profit.

Pat Wood
