INDEPENDENT REGULATORY  
REVIEW COMMISSION

Dear Mary Bender;

I saw your article in the intell this morning and I thought I'd write you as you had requested.

I'd say let the dog laws as thry were and get these folks who are requesting a change to go to crippled children hosiptals and help the crippled children. Have them spend their time and mone y where its helpful. God will reward them.

There are more people being abused than animals.

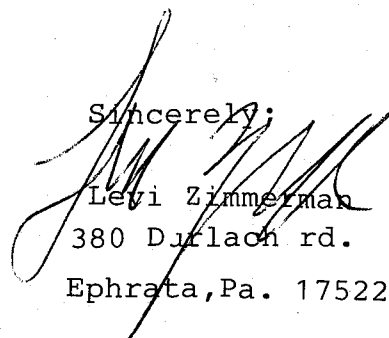

It not what people do to animals, it what animals do to each other

I can help them find hospitals in Phila, New York city that would be glad for volunteers to give a crippled child a cup of cold water, or play games with them, or push them in their wheel chair, or any other companionship which will make them smile and happy. I'm sure Harrisburg area hospitals could also need such volunteers.

I could write more, but I hope you can past this message on to these folks who have nothin g else to do but mind other peoples business and torment kennel owners so they cant follow the current dog laws.

Call me at tel/fax 717-733-0058 after 3:30 PM

Sincerely;

  
Levi Zimmerman
