INDEPENDENT REGULATORY  
REVIEW COMMISSION

PLEASE help those with no voice of their own  
Please know that this is an  
empassioned plea to you regarding  
these innocents. I have seen up close  
the result of the puppy mill bust over  
east & partook in their rescue & efforts  
to help them on their way to great lives.  
I pick my battles carefully & these guys  
cant speak for themselves. As you know  
their conditions were beyond belief. To date  
they are happy & by no means the same  
animals. I havent much but would give  
my eye teeth to express the broken hearts  
& spirits in which they were forced to live <sup>& have</sup>  
THIS you know, however a most glaring <sup>ax of</sup>  
consequence of the upcoming laws would <sup>resu</sup>  
so effect the small breeders, above reproach,  
& hand the breeding back into the hands  
of puppy-mills & large breeders which I  
dont believe is the desired effect, particularly  
on the part of Governor Rendell. I believe  
his heart is in the right place but in the  
hands of unscrupulous owners & breeders points  
become hazy & may well not be in the best  
interest of any one or thing involved. I'm  
sure as with you, this is not what our  
governor desires

We stand at the stroke of  
midnight regarding the possible passage  
of these laws. The problem is the specifics  
of the changes remain "nebulous" at best  
It has not been widely publicized & ego fearing  
countless owners & breeder in the dark, as if  
they don't exist. Many of these that...

All told remain incredulous that such a law could even be conceptualized, much less passed. Many are afraid of being singled out or getting into trouble. Some figure if it doesn't effect them now then why care. The trouble is it will. Not only is it written cryptically, but also give an upward slant "It won't effect you" When then like this happened in public outcry, but the laws were in place & nothing could be done.

Responsible ownership is imperative as well as their breeding. Due to irresponsible owners the #s of unwanted dogs are staggering & euthanasia a detestable part of your job (Don't envy you)

PLEASE know just because a breeder maybe a small one does not necessitate them being a backyard breeder & only out for the money. All things considered there is not that much to be made if given daily pre & post natal care. I've got a breeder friend that pairs over each one of her pups & doesn't sell to just anyone. They are so clean, lovely friendly & above all happy & well adjusted. I know of many others as well, who's dogs own half portions of their heart. Please take these facts into consideration. Come see them you'll see for yourself. Yours are not the exception rather - the rule

look a little deeper than the surface. Please re-consider. It's not about the money but rather the betterment of the breed. The ball is in your court I beg you turn the tide. TV, news, paper, radio-interviews. PLEASE let us help you

Just as w setters, Dalmations & on down the line the breeds could be destroyed due to bad breeders. These people are not about the bucks but maintain what has taken <sup>(I'm speaking of)</sup> hundreds of years, love, thought & good breeding (lines)

I am certainly not saying that all BK6

Beautiful animals from such places & proving them more than competent

While I whole heartedly agree there should be sanctions on breeding circumstances & care. Please take a moment to think where you would want to get your dog from. All but one of my dogs was found. I am not an elitist I don't know what else to say

except to please think of what I've said Small, medium or large breeders should fall under certain criteria. But don't kill the little guy or medium guy for unscrupulous reasons. All it does is perpetuate an already bad set of circumstances. There much to be said for the big guys. Please consider the one on one the smaller guys get with smaller amounts pups present

When we rescued those guys from over east their were crippled ones living on top of each other, they were completely unsocialized terrified & filthy. It took 6 washes each to BEGIN to tell their color. They were jammed & unapproachable out of fear. When done bred they were left to live out lives 5 to a pen. Within 24 hrs of TLC they were not the same That's all it took Please don't allow this to continue

I stand ready to provide any all info you may need to prevent such torture from occurring again. Indeed this is a pre midnight plea. Only you are in a position to keep this from happening again. I beg you to contact me. Thank you so much. I believe our intentions are SO VERY similar. As stated a ton stand behind me but are afraid to speak up.

Please stop or @ least delay  
this legislation.

More people are mortified  
that such a bill could pass, &  
that short of your intervention  
will. It will effect every breed  
all blood lines & dilute &  
alter the lines it has taken  
centuries to build, or should  
I say BREED in

Let their voices be heard  
& dont slide it under the  
table It is not right

Thank you for your  
time & patience

I implore you to believe how  
many stand behind me  
but found out too late  
to respond!

How about an 800#?

Anything

Most Sincerely  
Susan Balogh

Please  
respond

You hold in  
your hand the  
ability to right  
a wrong. In many  
cases the places should  
be looked into but  
Please dont punish  
the innocent . . .
