**Subject:** Act 58

To whom it may concern it has come to my attention that there is a proposal to charge RN's \$75.00 per CEU for the continuing education requirement for licensure. I promote education to my peers, novice nurses and to students coming in to the profession This is an injustice to hard overworked nurses to add this financial burden to them. There are so many continuing education opportunities out there. In my 20 plus years as a nurse I have found that we are expected to buck-up and deal with what ever is handed to us. This is an outrage and I protest..... We have a hard enough time trying to recruit nurses to our state and you add this to us. Please reconsider; the requirement is a good one but make it an economical solution not a financial burden to the nurse. Thank you Barbara Butler RN, BSN, CCRN
