INDEPENDENT REGULATORY
REVIEW COMMISSION

Dear Mr. Filoromo:

This is to inform you that we have reviewed the proposed regulations to Title 7 of the PA Code pertaining to Amusement Rides and Amusement Attractions, regulation #2-102 (#2616). Our members are quite concerned that amusement rides and attractions are properly inspected in order to provide a safe environment. We agree that the regulations needed to be updated so as to place the Commonwealth's standards into greater conformity with the accepted international standards for amusement ride and attraction design, construction and operation.

After reviewing the proposed regulations, we have concluded that we do not have any concerns with the proposal and that it would not impose any financial or administrative burdens on local government.

We would request notification when the final-form regulation is delivered to the Independent Regulatory Review Commission (IRRC).

We appreciate your cooperation regarding this issue.

Sincerely,

Elam M. Herr
Assistant Executive Director
