Subject: Question about reference checking for caregiver of non- medical companies

My question is regarding reference checking for an individual applying to a nonmedical care company as a caregiver.

I understand not less than 2 satisfactory references are required. What are the standards or rules of satisfactory?

Will there be a standard form to follow? Is there a list of content standards that make the reference satisfactory?

Basically how is satisfactory determined?

Thank You for your time in answering my question.

Pat Lyons
