Subject: 25 PA Code Ch 109 - Public Notification Revisions

My comment is on page 2 of the PA Bulletin notice on proposed rulemaking 25 PA Code Ch. 109, Safe Drinking Water, Public Notification Revisions:

D. Background and Purpose, Delivery methods for Tier 1 public notices
The last line of that section states, "To reach people who are transient and nontransient users, the proposed rulemaking also requires suppliers to use broadcast media such as radio or TV." (emphasis added)

However, this change was made to: §109.408(c)(2) Noncommunity water systems. Noncommunity water systems shall provide notice to transient and nontransient consumers using one or more of the following forms of delivery:

- (i) Posting the notice in conspicuous locations throughout the area served by the water system.
- (ii) Another form of delivery approved in writing by the Department.

This change does not appear to require broadcast media be used for notifications by noncommunity water systems. It simply makes it an option.

If this is what is meant, the statement in the "Background and Purpose" section should be revised to eliminate any confusion or improper application of requirements.
