Dear Dr. Fasano:

In terms of patient care, it is very important for osteopathic physicians to be able to have the physicians assistants who work for them to prescribe medications. If equality of PAs is determined by the Doctor they work with, its hard not to think that legally qualified health care providers (DOs) would have to have different rights. I believe this is a very important issue and if the osteopathic profession is to be seen equally (which it should) I think changes should be made here.
