RECEIVED

Dear Dr. Fasano,

Please consider giving PAs supervised by DOs prescriptive authority. My primary supervisor is an MD but one of my secondary supervisors is a DO. Not allowing a PA supervised by a DO ^{to prescribe} is an obstruction to good patient care. PAs safely prescribe medicine every day. Not allowing it under a DO suggests the DO is somehow less able to participate in the PA-doctor relationship. This should be changed. Thank you -

Sincerely,

Terri E Joyce PA-C

and

Michael L. Joyce PA C
