Subject: Proposed Rulemaking - Diesel Vehicle Idling; and Auxiliary Power Systems (#7-422) NDEPENDENT REGULATION

Re: Proposed Rulemaking - Diesel Vehicle Idling; and Auxiliary Power Systems (#7-422)

The Environmental Quality Board (EQB) has received the following comments regarding the above-referenced proposed rulemaking.

Commentor Information:

Norma Butler

Thedford NE 69166 US

Just thought you might consider how you would feel if you could only turn on the heat or A/C in your home when it gets below 40 or above 75 . . . most truck drivers live in their trucks about 85% of the time so in effect it is their home. I understand the need to be mindful of the environment, and we all have to help but I think this proposal is over the top . . does it apply to other vehicles as well, such as the big motor homes driven thru your fair state on the way south? This is a form of discrimination, and I feel that unless the law is being applied to all citizens equally, it shouldn't be a law.

Please contact me if you have any questions.

Sincerely,

Michele L. Tate
