^^

To me it is just commensense. If you are home could you sleep at 50 or 60 degrees. This is all about safty. You ask me to stop and rest for 10 hrs . and I do like that but how can I if I can't rest because of the temp.. I do think that if you are in the sleeper you should be able to run your heat or air. If you are just sitting around or not in the truck it should be against the law. There is no reson to run a truck other than for confort and rest. Thank-you
^^

Please contact me if you have any questions.
Sincerely,
Michele L. Tate
