Subject: Proposed Rulemaking - Diesel Vehicle Idling; and Auxiliary Power Systems (#7-422)

INDEPENDENT REGULATORY
REVIEW COMMISSION

Re: Proposed Rulemaking - Diesel Vehicle Idling; and Auxiliary Power Systems (#7-422)

The Environmental Quality Board (EQB) has received the following comments regarding the above-referenced proposed rulemaking.

Commentor Information:

Mark Rittgers

^^

75 degree is way too high. The engine puts out a great deal of heat for 3 or 4 hours after shutting down. I find that I need air conditioning anytime the temp is above 60. 40 degrees is too low after sitting for 2 or 3 hours, especially if the wind is blowing. People who have actually driven trucks need to make these rules.

^^

Please contact me if you have any questions.
Sincerely,
Michele L. Tate
