INDEPENDENT REGULATORY
REVIEW COMMISSION
Environmental Quality Board,
P.O. Box 8477,
Harrisburg, PA 17105

Dear Board:

I am concernd about the eroding of air quality in my town. I am concerened about the my health, the health of developing children in my community, and the harmful economic affects of truck traffic and diesel emissions.

In this day and age we should be able to move freight by rail. Where trucks are a necessity their heating and cooling source should be electrical plug in and not truck idling.

We currently have young men amd women fighting overseas to protect oil supplies. For them to risk their lives so we can waste diesel fuel in idling trucks is deplorable.

Please vote for this regulation to preserve the air in my community.

Sincerely,

Stephen Hughes
