Subject: Proposed Rulemaking - Diesel Vehicle Idling; and Auxiliary Power Systems (#7-422)

Re: Proposed Rulemaking - Diesel Vehicle Idling; and Auxiliary Power Systems (#7-422)

The Environmental Quality Board (EQB) has received the following comments regarding the above-referenced proposed rulemaking.

Commentor Information: Debbie Bromiley Bromiley Trucking Inc, bromiley@msn.com 8116 Susie St Jacksonville FL 32210 US ^^^^^

I think that the idling law is wrong, with the price of diesel now the trucker is not idling, they are freezing. If you are going to limit idling, then do it to RV's, Buses and everyone who has a diesel Vehicle including a personal verhicle that is park at a rest area. I understand about the environment and all, but hey they other citzens still play loud music, they still smoke, they still trash the cities, a normal trucker is not going to waste gas with the price of it now. I would think twice, before placing the idling law into effect. Thanks Debbie Bromiley ~~~~~~~~~~

Please contact me if you have any questions. Sincerely, Michele L. Tate
