With the price of fuel Idleing is an added cost that can't be passed on to the customer. I know as a truck driver we are last class citizens with no rights whatsoever and an added source of revenue for any state coffers. What I need to know is my home is oil heat how long (because I'm a trucker) before you tell my family to shut off the heat? or to run the furnace for five minutes an hour.

Please contact me if you have any questions.
