~~~~~  
We are all having to contribute to being better stewards of our planet. We need to encourage the trucking industry to fit their rigs with small generator sets, so they can turn off their main deisel engines when parked. Trucking companies can get a good return on the cost of installing these gensets, especially as the price of fuel increases. They just need an "incentive" to make the investments. This rule making should encourage these investments.  
~~~~~

Please contact me if you have any questions.

Sincerely,
Michele L. Tate
