~~~~~  
I strongly urge you to improve air quality in Pennsylvania by approving the proposed Diesel Vehicle Idling and Auxiliary Power Systems amendments to 25 PA Code Chapters 121 and 126. Fine particulates from diesel engines trigger asthma attacks and heart attacks, and can lead to cancer and premature death in the long run. When implemented, this rule will prevent approximately 30 tons of dangerous particulate pollution from entering our air. For the health of my community, I strongly urge you to approve the proposed rulemaking. Thank you for your time. Please send any response to the address listed. Sincerely, Elaine Dellande
