Subject: Proposed Rulemaking - Diesel Vehicle Idling; and Auxiliary Power Systems (#7,422)

Re: Proposed Rulemaking - Diesel Vehicle Idling; and Auxiliary Power Systems (#7-422)

The Environmental Quality Board (EQB) has received the following comments regarding the above-referenced proposed rulemaking.

Commentor Information:

Kevin Kulp

2785 N. Charlotte St. Gilbertsville PA 19525 US

This is the wrong kind of legislation and if passed I will never set foot in a truck again. The cab is a driver's home and if a driver can't idle they can't enjoy the comforts of their homes on the road. If this gets passed then there should also be laws that don't allowed time lights either because all the vehicles sitting at lights would be idling also and causing polution. Please do not be careless and pass laws that violate basic human rights. How would you feel if there was a law that required you not to enjoy electricity in your home?

Please contact me if you have any questions.

Sincerely,

Michele L. Tate
