^^

about the truck law sorry but they wrong we live in our trucks they are our office our home an transportation why
should we be singled out when you pollut when you go to work in your car your office is warm or cool depending on
the weatherwhich uses energy to keep it that way when you go home you keep your home warm or cool which uses
energy that is making pollution but we get singled out an are made to be cool or hot to save on pollution yet police can
idle their cars to stay comfortable

^^

Please contact me if you have any questions.
Sincerely,
Michele L. Tate
