INDEPENDENT REGULATORY  
REVIEW COMMISSION

October 19, 2009

The Honorable Arthur Coccodrilli, Chairman  
Independent Regulatory Review Commission  
333 Market Street, 14th Floor  
Harrisburg, Pa 17010

Dear IRRC Chairman Coccodrilli:

On behalf of 400 members of the Radnor community I would like to express our opposition to the Keystone Exams as proposed in the Final Form Regulations being considered the IRRC this month. Below is the petition that was circulated to members of our school and local community. In the petition we believe we have fairly outlined the issues with respect to our students and taxpayers. We would appreciate you taking these concerns into consideration during your review of IRRC #2696 - Final Form of the Chapter 4 Regulations - Keystone Exams.

You should also know that Radnor Township School Board unanimously adopted a resolution on May 12, 2009, opposing the Keystone Exams. Copies of both of the Petition and the RTSD Resolution are attached.

Thank You for your consideration,

Patricia Booker  
School Director, Radnor Township  
484-343-2685

To: Representative William Adolph  
Representative Bryan Lentz  
Rep. Greg Vitali  
Senator Daylin Leach  
Members of the Independent Regulatory Commission

This petition, signed by educators, parents, administrators, students and concerned tax payers is to express our **opposition to the current proposed final form Chapter 4 regulations to require Keystone Exams** as end of course/graduation requirements for students.

**Overall Concern:**

These exams do not address the cited problem of the lack of preparedness of some students graduating from Pennsylvania public schools. The Pennsylvania System of School Assessments (PSSA) already provides data to the State Department of Education to measure the performance of

each school district and they provide a comparison to other districts. District educators use the PSSA data, and the subject tests, to evaluate individual student's performance and inform instruction. The current test systems already identify students who are at risk; what is needed is funding to help districts implement educational programs that can help struggling students succeed.

**Radnor Township School District Spends 20% of our educational dollars (~\$12,000,000) on programming that goes beyond the basics to help ensure that all of our students can succeed. Yet only 12% of our funding (~\$7,359,928) comes from the State and Federal government combined.** As a result of our local community's support of critical programming Radnor students have the resources to consistently perform above the state average. Our schools have again achieved Adequate Yearly Progress levels required by No Child Left Behind. A closer look at the budget decisions made by top performing schools like Radnor clearly demonstrates the importance of investing in educational programming designed to help all students to achieve. Without the proper funding for educational programs, the only thing a new testing system can accomplish is to waste tax payer dollars.

### **Issues with the Keystone Exams:**

This plan introduces excessive costs to the taxpayer - the \$201 million dollar contract to develop the tests is the tip of the iceberg. The costs to fully implement this plan are not known. It is another unfunded mandate for the State budget and the local school district budgets. Where will the money come from? What programs will need to be cancelled to support the new testing?

This plan introduces at least three new governmental boards and panels. It takes away local control; subjects struggling students to a "regional" level panel review and introduces bureaucracy and red tape that does nothing to help a student succeed.

This plan will distort the "meaning" of the Grade Point Average. As proposed, these exams will be scored on a 100 point scale and will count for one-third of the final course grade. Furthermore, students scoring below basic on a Keystone Exam or on a module, for whatever reason, get NO credit for what they do know; rather they will be given a zero for 1/3 of their grade.

This plan also allows students that do not score proficient or above to retake a module and improve their score. However, students that score above basic will not be able to retake the tests to improve their score. These exams have the capacity to drag down the grades of fundamentally better students in comparison to their weaker peers. It will be hard to explain to college admissions officers.

This plan replaces our rigorous mid-terms and finals with one size fits all Keystone Exams and will serve to narrow the curriculum at Radnor High School. How could it be in the educational best interest of students to administer the same Keystone Exam to students in General Biology, Accelerated Biology, and Honors Biology? Assessments have to be designed to reflect the rigor of those various courses.

This plan does nothing to address the disparity between districts - not all students in Pennsylvania have access to the same resources in the classroom, and those resources are reflected in the facilities, the classroom materials, and in the quality of the teachers. This plan provides no assistance for districts that need to develop and implement strong remediation programs needed to help those that can not pass the Keystone Exams.

This plan requires funding to be diverted to a new testing program that has no basis in research while other worthwhile educational programs are being cut in order to deal with the current economic crisis.

The undersigned want you to send a message to the Department of Education telling them that they need to re-evaluate the objective of the proposed Chapter 4 Regulations, Keystone Exams, and work with local school districts to develop solutions that will help struggling students to succeed.

## **RESOLUTION OPPOSING PROPOSED HIGH SCHOOL KEYSTONE EXAMS**

by the Board of School Directors  
Radnor Township School District

May 12, 2009

WHEREAS, the Radnor Township School District is committed to preparing all students for success in college and the workplace by providing a challenging and rich curriculum that focuses on developing in students a passion for learning, personal integrity, the pursuit of excellence and social responsibility; and

WHEREAS, in the Radnor Township School District, graduates who have not scored proficient on the PSSA have shown understanding of state standards through a variety of other assessments including portfolios, oral presentations, hands-on demonstrations, and other methods; and

WHEREAS, the Radnor Township School District recognizes the importance of assessments and makes use of the PSSAs and local assessments to provide the district with information about students in need of remediation, consequently another layer of testing will only confirm what is already known; and

WHEREAS, the State, without regulatory change, can extend technical and financial assistance to districts already known to be struggling; and

WHEREAS, verification of the validity of local assessments as an alternative to the Keystone Exams would be required every six years and would be costly to the school district and administration in both time and money; and

WHEREAS, the monies required by the districts for verification of the validity of local assessments would require expenditures that would be better spent in classrooms; and

WHEREAS, the criteria for local assessments are undefined and may discourage assessments that would be beneficial for diverse learners; and

WHEREAS, the addition of the Keystone Exams would reduce the number of instructional days and impose an unreasonable load of high-stakes testing on students who are already facing a burden of stressful standardized tests; and

WHEREAS, the Keystone Exams will have continuing economic impact on districts operating under Act 1 fiscal constraints and on taxpayers across the Commonwealth, and these required expenditures have no proof of cost effectiveness; and

WHEREAS, the State, having already identified best practices related to local proficiency assessments, can share these methods with all districts without the need to add Keystone Examinations and related expenses;

NOW THEREFORE, BE IT RESOLVED that the Board of School Directors of the Radnor Township School District opposes the State Board of Education proposals to enact Keystone Exams and any other regulations or legislation that usurp the authority of local school districts to determine whether their students have earned high school diplomas. This resolution will be shared with the State Board of Education, legislators, including local legislators and members of the Senate and House Education Committees, and the Independent Regulatory Review Commission.

Revised: 5/15/09

September 2009

To: Representative William Adolph  
Representative Bryan Lentz  
Rep. Greg Vitali  
Senator Daylin Leach

This petition, signed by educators, parents, administrators, students and concerned tax payers is to express our **opposition to the current proposed final form Chapter 4 regulations to require Keystone Exams** as end of course/graduation requirements for students.

**Overall Concern:**

These exams do not address the cited problem of the lack of preparedness of some students graduating from Pennsylvania public schools. The Pennsylvania System of School Assessments (PSSA) already provides data to the State Department of Education to measure the performance of each school district and they provide a comparison to other districts. District educators use the PSSA data, and the subject tests, to evaluate individual student's performance and inform instruction. The current test systems already identify students who are at risk; what is needed is funding to help districts implement educational programs that can help struggling students succeed.

**Radnor Township School District Spends 20% of our educational dollars (~\$12,000,000) on programming that goes beyond the basics to help ensure that all of our students can succeed. Yet only 12% of our funding (~\$7,359,928) comes from the State and Federal government combined.** As a result of our local community's support of critical programming Radnor students have the resources to consistently perform above the state average. Our schools have again achieved Adequate Yearly Progress levels required by No Child Left Behind. A closer look at the budget decisions made by top performing schools like Radnor clearly demonstrates the importance of investing in educational programming designed to help all students to achieve. Without the proper funding for educational programs, the only thing a new testing system can accomplish is to waste tax payer dollars.

**Issues with the Keystone Exams:**

This plan introduces excessive costs to the taxpayer - the \$201 million dollar contract to develop the tests is the tip of the iceberg. The costs to fully implement this plan are not known. It is another unfunded mandate for the State budget and the local school district budgets. Where will the money come from? What programs will need to be cancelled to support the new testing?

This plan introduces at least three new governmental boards and panels. It takes away local control; subjects struggling students to a "regional" level panel review and introduces bureaucracy and red tape that does nothing to help a student succeed.

This plan will distort the "meaning" of the Grade Point Average. As proposed, these exams will be scored on a 100 point scale and will count for one-third of the final course grade. Furthermore, students scoring below basic on a Keystone Exam or on a module, for whatever reason, get NO credit for what they do know; rather they will be given a zero for 1/3 of their grade.

This plan also allows students that do not score proficient or above to retake a module and improve their score. However, students that score above basic will not be able to retake the tests to improve their score. These exams have the capacity to drag down the grades of fundamentally better students in comparison to their weaker peers. It will be hard to explain to college admissions officers.

This plan replaces our rigorous mid-terms and finals with one size fits all Keystone Exams and will serve to narrow the curriculum at Radnor High School. How could it be in the educational best interest of students to administer the same Keystone Exam to students in General Biology, Accelerated Biology, and Honors Biology? Assessments have to be designed to reflect the rigor of those various courses.

This plan does nothing to address the disparity between districts - not all students in Pennsylvania have access to the same resources in the classroom, and those resources are reflected in the facilities, the classroom materials, and in the quality of the teachers. This plan provides no assistance for districts that need to develop and implement strong remediation programs needed to help those that can not pass the Keystone Exams.

This plan requires funding to be diverted to a new testing program that has no basis in research while other worthwhile educational programs are being cut in order to deal with the current economic crisis.

The undersigned want you to send a message to the Department of Education telling them that they need to re-evaluate the objective of the proposed Chapter 4 Regulations, Keystone Exams, and work with local school districts to develop solutions that will help struggling students to succeed.

This petition is being circulated by or on the behalf of Patricia Booker, Radnor Township School Director and IU Legislative Council Representative. Questions can be sent to [rpbooker@msn.com](mailto:rpbooker@msn.com)
