INDEPENDENT REGULATORY  
REVIEW COMMISSION

James,

I recently heard Dr. Z speak about changing grad requirements.

As a math strong student of PA schools and a returning resident from DC to Johnstown to build business, I know the value of mathematics.

Because of a concentration of computers and mathematics at a young age, I was able to become a researcher at the National Institute of Standards and Technology ([www.NIST.gov](http://www.NIST.gov)). Please support more students to have the same opportunity that I have had.

Sincerely,

Michael P. Hruska
