**Subject:** IRRC Issue #2696 - A question or two or three

I reviewed the documents and did not see anything that indicated teacher participation in making the students successful.

How will teachers be held accountable to this process of preparing the children to be ready for the end of year testing?

Will the effectiveness of their teaching be judged, based on how well their students perform?

Will there be effective discipline to those teachers who are known to be more interested in earning a paycheck than being effective and influential teachers?

Thank you.

Winston A Jones
