RECEIVED

By way of this email we would like to submit for your review the attached petition recently circulated in Radnor Township in opposition to the PDE proposal of the final form Chapter 4 regulations/Keystone Exams. The attached online petition has generated 256 signatures in just a few days. We fully expect to see double, if not triple, the signatures once parents get back into the swing of the school year.

Please note that 82 of these signatures come from the teachers and staff. This alone should get your attention as the professionals, stripped of the constraints placed on them by the union, are showing a lack of support for the proposed final form regulations.

We will continue to collect signatures and bring our community up to speed with regards to this unfunded mandate. We are asking that you will consider the concerns expressed in this petition and send this proposed final form of the regulation back to PDE for further review. Please encourage them to find a real compromise that accomplishes the goal of making all of our students prepared for the real world in a responsible and meaningful way that is fair to the taxpayers and the students.

Should you have any questions about the petition, those who signed it or otherwise, please contact me at [rpbooker@msn.com](mailto:rpbooker@msn.com) or 484-343-2685

We look forward to seeing your future actions on this matter.

best regards

Pattie Booker  
Radnor Township School Board Director

September 2009

To: Representative William Adolf  
Representative Bryan Lentz  
Rep. Greg Vitali  
Senator Daylin Leach

This petition, signed by educators, parents, administrators, students and concerned tax payers is to express our **opposition to the current proposed final form Chapter 4 regulations to require Keystone Exams** as end of course/graduation requirements for students.

**Overall Concern:**

These exams do not address the cited problem of the lack of preparedness of some students graduating from Pennsylvania public schools. The Pennsylvania System of School Assessments (PSSA) already provides data to the State Department of Education to measure the performance of each school district and they provide a comparison to other districts. District educators use the PSSA data, and the subject tests, to evaluate individual student's performance and inform instruction. The current test systems already identify students who are at risk; what is needed is funding to help districts implement educational programs that can help struggling students succeed.

**Radnor Township School District Spends 20% of our educational dollars (~\$12,000,000)** on programming that goes beyond the basics to help ensure that all of our students can succeed. Yet only **12% of our funding (~\$7,359,928) comes from the State and Federal** government combined. As a result of our local community's support of critical programming Radnor students have the resources to consistently perform above the state average. Our schools have again achieved Adequate Yearly Progress levels required by No Child Left Behind. A closer look at the budget decisions made by top performing schools like Radnor clearly demonstrates the importance of investing in educational programming designed to help all students to achieve. Without the proper funding for educational programs, the only thing a new testing system can accomplish is to waste tax payer dollars.

**Issues with the Keystone Exams:**

This plan introduces excessive costs to the taxpayer - the \$201 million dollar contract to develop the tests is the tip of the iceberg. The costs to fully implement this plan are not known. It is another unfunded mandate for the State budget and the local school district budgets. Where will the money come from? What programs will need to be cancelled to support the new testing?

This plan introduces at least three new governmental boards and panels. It takes away local control; subjects struggling students to a "regional" level panel review and introduces bureaucracy and red tape that does nothing to help a student succeed.

This plan will distort the "meaning" of the Grade Point Average. As proposed, these exams will be scored on a 100 point scale and will count for one-third of the final course grade. Furthermore, students scoring below basic on a Keystone Exam or on a module, for whatever reason, get NO credit for what they do know; rather they will be given a zero for 1/3 of their grade.

This plan also allows students that do not score proficient or above to retake a module and improve their score. However, students that score above basic will not be able to retake the tests to improve their score. These exams have the capacity to drag down the grades of fundamentally better students in comparison to their weaker peers. It will be hard to explain to college admissions officers.

This plan replaces our rigorous mid-terms and finals with one size fits all Keystone Exams and will serve to narrow the curriculum at Radnor High School. How could it be in the educational best interest of students to administer the same Keystone Exam to students in General Biology, Accelerated Biology, and Honors Biology? Assessments have to be designed to reflect the rigor of those various courses.

This plan does nothing to address the disparity between districts - not all students in Pennsylvania have access to the same resources in the classroom, and those resources are reflected in the facilities, the classroom materials, and in the quality of the teachers. This plan provides no assistance for districts that need to develop and implement strong remediation programs needed to help those that can not pass the Keystone Exams.

This plan requires funding to be diverted to a new testing program that has no basis in research while other worthwhile educational programs are being cut in order to deal with the current economic crisis.

The undersigned want you to send a message to the Department of Education telling them that they need to re-evaluate the objective of the proposed Chapter 4 Regulations, Keystone Exams, and work with local school districts to develop solutions that will help struggling students to succeed.

This petition is being circulated by or on the behalf of Patricia Booker, Radnor Township School Director and IU Legislative Council Representative. Questions can be sent to [rpbooker@msn.com](mailto:rpbooker@msn.com)
