Subject: DH regulation changes

To Whom It May Concern,

I am a Registered Dental Hygienist in support of the changes in regulations regarding administration of local anesthesia, PHDHP, both supervision changes, and the changes in continuing education requirements. These new regulations are appropriate and imperative for better access to care and proficiency in time management. The role of the RDH is extremely valuable in our communities statewide and these revisions are vital to our success in terms of our patients receiving the best care possible through education and routine dental prophylaxis.

Sincerely,

Pamela S. Motter, RDH, BS
