Subject: DH regulations

I think that the changes in the dental hygiene regulations would greatly benefit the role of a distinguished dental hygienist. I am a student currently in the learning process to obtain my license but I believe that with our knowledge we are quite capable of doing these procedures such as administer anesthesia and take radiographs in agreement with the dentist of whether or not their presence is needed. I firmly believe that the dentist and the RDH should determine the "level of supervision" prior to reviewing the medical / dental history.

Emily Vail, SDH
