I am writing in support of the dental hygiene regulations. I believe that it is a great idea to license the hygienists to administer anesthesia. It would make appointment times more productive, and you would not have to pull the dentist from their appointment times.

I also think it a great idea to change "level of supervision will be determined by the dentist and the RDH after review of the patients' medical and dental history." I also recommend free clinics as a site for Public Health Dental Hygiene Practitioners to practice.

Thank you,
