I would just like to take the time to express my gratitude for the changes that have been made to the dental hygiene regulations including anesthesia and general supervision requirements. It is such a great opportunity you are providing us and I know that we will make the best of it. Im sure you will see what a great decision it was to provide us these opportunities. I know they have been long awaited and I am personally very excited that I will be able to graduate and join the workforce with these new skills and opportunities. It is really helping to grow our profession and for that I am extremely grateful.
