Subject: Support of new Dental Hygiene Regulations

As a long-time practicing hygienist in PA, and a recent BS degree completion student with an interest in public health, I commend the state for all of their work to improve access to care in our state. I do wish to add a suggestion that all free health clinics be included in the areas that Public Health Dental Hygiene Practitioners be able to practice in. These are the areas where we need the most help, especially for the children of PA. Thanks!
