December 2, 2008

To: Ann Steffanic, Board Administrator

The purpose of this communication is to fully support the 16A-5124: CRNP General revisions. I have been an actively practicing manager in health care in both the acute and non-acute arena for over 37 years. The Nurse Practitioners I have worked beside have been meticulous and precise in their practice. Like any licensed professional they are accountable for their practice, and this should be the standard by which this revision is passed.

Sincerely,

Susan C. Stahl RN
