**Subject:** RE: regulation #2729

To the IRRC;

I just wish to send you my public comment on regulation #2729. I find the part of the regulation that would restrict NP's from seeing certain patient's based on their complex health diagnoses is not helpful and redundant. First and foremost it will place another barrier for access to medical care for those who are particularly vulnerable, the poor and underinsured Pennsylvania residents. This regulation is also redundant because we already review patients with our collaborating physician especially in instances where patients are complex so that we manage their care better. I would recommend that this portion of the #2729 regulation be removed. Thanks you for the opportunity to comment on this matter.

Sincerely,  
Karen Cesarano FNP-BC
