Subject: New Raw Milk Regulations Comments Section 59a.410

RECEIVED
IRRC

2010 SEP 28 A 9 46

Gentlemen:

I do believe that your motives are admirable and honorable to further regulate milk sales for protection of the consumer.

However, the usual on farm raw milk sales from farmer to consumer should not be regulated as it is not a mass produced large scale distribution item. Please leave what I buy from my neighbor be between me and him. There are far too many unnecessary regulations now and too many bureaucrats needed to oversee these regulations.

Do not further regulate Raw milk sales. Please just leave as is. There is nothing wrong with it now. If you must, tighten up production systems for mass distribution but not individual to individual sales.

Production methods cannot improve the food value of raw milk. Production methods, pasteurization and homogenization only degrade the milk. Do not eliminate my ability to buy the good raw product. If I cannot get raw milk, I will not buy processed milk as it has no value and is in fact a negative value food in my opinion.
